Partial List of Licenses & Certifications

United States Environmental Protection Agency (EPA)
 United States EPA Asbestos Hazard Emergency Response Act (AHERA)
 United States Department of Labor, OSHA
 American Industrial Hygiene Association
 American Institute of Professional Geologist (AIPG)
 American Petroleum Institute (API) 510/570/653
 Academy of Certified Hazardous Materials Managers
 American Society of Non Destructive Testing (ASNT)
 Steel Tank Institute (STI) SP001
 National Institute of Occupations Safety & Health ((NIOSH)
 Multi-state certifications – LSRP, LSP, PE

Safety

TTI Environmental, Inc. is committed to maintaining a safe work environment for all employees and considers health and safety a fundamental value of the organization. TTI has established 40 comprehensive written safety procedures appropriate for the various services provided by the Company. These procedures, along with competent person and bi-annual health and safety training, are part of the on-going TTI Health and Safety Program.

ISNetworld Member (#400-176589)

TTI is a preferred contractor of ISNetworld, the global resource for connecting corporations with safe, reliable contractors and/or suppliers for capital sensitive industries. TTI is able to achieve this because of our commitment to quality, environmental, health and safety compliance.

Federal Capabilities

As a SDVOSB, TTI is a Federal Prime and Subcontractor. TTI self-performs projects as a Federal Prime and Subcontractor and benefits prime contractors by helping them meet their requirements for contracting with small business on Federal and State contracts.

Our professionals have a diverse range of qualifications and scientific expertise with in-depth knowledge of permitting and compliance protocols. We are committed to providing superior service and efficiency, helping clients to protect assets and limit liabilities when faced with environmental challenges.

New Jersey Site Remediation - Religious Institution

TTI provides expertise on numerous environmental issues since 1990 in regards to New Jersey's strict site remediation regulations related to contaminated properties. TTI conducts site investigations, remedial investigations, remedial action work plans, storage tank removals and LSRP services for a New Jersey located Diocese.

Phase I/Phase II – Financial Institutions

TTI provides all aspects of due diligence services to financial institutions for over 20 years. TTI is an approved environmental consultant/vendor for multiple financial institutions including TD Bank, BB&T, Investors, Wells Fargo, Ocean First, Republic and Columbia.

Preliminary Assessment Reports – Day Cares

All new and currently operating day care centers are required to obtain a Preliminary Assessment Report (PAR) and an Indoor Environmental Health Assessment (IEHA). TTI has conducted hundreds of PARs and IEHAs since 2007 and continues to provide both for new school construction and new operating license applications.

INDUSTRIAL HYGIENE

AHERA Compliance
Asbestos Surveys & Testing
Asbestos Abatement Design Management & Monitoring
Asbestos O & M Programs
Asbestos Awareness Training
Lead-Based Paint Risk Assessment & Surveys
Mold Investigations & Remediation Design
Indoor Air Quality Testing
IAQ Program Development
Right to Know Compliance
Indoor Environmental Health Assessment

ENVIRONMENTAL HEALTH & SAFETY

OSHA Workplace Program Development and Training
Storm and Waste Water Discharge Permitting
Solid and Hazardous Waste Management
Security Vulnerability Assessments (SVA)
Hazardous Risk Management & Contingency Planning including RCRA, RMP, HAZWOPER, PSM, DOT Security and SPCC Plans
Preparation and Submittal of Annual Combustion Adjustment Reports (NJDEP)
Air Quality Compliance
Greenhouse Gas Reporting
Site Specific Health and Safety Plans

TTI owns and operates heavy equipment and uses the latest and most technologically advanced tools and machines. Our licensed professionals and equipment operators are OSHA trained and have advanced instruction in hazardous waste site operations and confined space entry. TTI's field crews are able to mobilize to provide service nationwide on many large and complex projects

Demolition/Removal/Remediation- Federal

TTI performed Tank Farm Demolition at Eglin Air Force Base, FL, as a subcontractor to a large engineer. Crews and heaving equipment demolished the Hydrant system and UST pit including soil remediation and disposal. The JP-8 piping was cleaned and abandoned. TTI also performed building and canopy demolition.

Demolition/Decommissioning – Private

TTI was awarded several prime contracts to decommission/demolish paint manufacturing facilities for one the other nation's largest paint & coatings company in FL, TX, CA, WA and PA. TTI provided manpower and heavy equipment for hazardous decontamination activities and demolition of process equipment including pipes, ASTs, USTs and buildings.

Remediation/Restoration – Federal

Prime contract under TTI's NAVFAC Washington IDIQ for Environmental A&E Construction Services 5 yr./5 mil. Demolition of Quarters K NEX Arlington, VA. TTI completed environmental investigation, removal of USTs, ASTs, natural gas fueling station, demolition of all buildings, canopy and utilities. Site restored to a field to be used as part of Arlington national Cemetery.

Construction Support & Management

We offer services supporting projects from design and permitting to the construction phase, analyzing site specific characteristics, design and regulatory requirements in areas of energy, pollution, transportation, land use, construction and water use. TTI is committed to finding responsible solutions to environmental challenges, merging natural sciences and land use management through Low Impact Development (LID) and green engineering.

Roadway Design and Engineering Services – State of Massachusetts

Re-design of roadway to address frequent flooding issues was undertaken by raising the roadway and installing a new culvert capable of conveying flows beneath the roadway, widening 20-foot paved width to 24 feet, adding space along one side of the roadway to accommodate a future sidewalk, and adding super elevation to improve the design speed of the roadway.

Design / Build Project – U. S. Army Corps of Engineers / Federal

Provided design and construction services for a new US Land Port of Entry (LPOE) building and associated site facilities using small port standard layout for the proposed building, together with design and engineering for associated roadways, parking areas for P.O.V and trucks, vehicle inspection station, security measures and supporting infrastructure to maintain existing operations during construction of the new permanent facilities.

TTI's MISSION STATEMENT

To provide sound environmental solutions to business, industry and government, merging regulatory requirements and scientific principles with business needs.

ENVIRONMENTAL CONTRACTING

Remediation
Demolition
Plant/Facility Decommissioning
Site Restoration
Building & Equipment Decontamination
Hazardous Waste Handling/Disposal
Remedial System Construction
Secondary Containment Construction/Storage Tanks
Concrete Pad & Foundation Installation
Complete Mechanical Systems for Storage Tanks
Complete Fuel Dispensing Systems

UNDERGROUND STORAGE TANK SERVICES

Removals and Installations
Systems Upgrades
O&M Programs
Complete Fuel Dispensing Systems Installation
Leak Detection/Monitoring Systems
Tank & Line Integrity Testing
Cathodic Protection Systems
Federal & State Compliance Audits
Annual Inspection & Maintenance Contracts
Oil/Water Separator
Tank Cleaning
Water/Sediment Removal of In-Service Tanks
Compliance & O&M Training

From corrective action and active remediation to compliance and closures, we realize each facility is unique and assist with plans that meet compliance as well as logistical and business needs. TTI owns and operates heavy equipment, and uses the latest and technologically advanced tools and machines.

Demolition / Removal / Remediation - Federal

TTI performed Tank Farm Demolition at Eglin Air Force Base, FL, as a subcontractor to a large engineer. Crews and heaving equipment demolished the Hydrant system and UST pit including soil remediation and disposal. The JP-8 piping was cleaned and abandoned. TTI also performed building and canopy demolition.

Removal / Installation - Energy Utility

TTI certified tank handlers removed USTs, including tanks, piping, dispensers, kiosk and all other related equipment for a location in Delaware for a leading Mid-Atlantic electric and gas utility company.

Compliance Inspections - Federal / Engineering

TTI provided environmental compliance services nationwide for the United States Postal Service as a subcontractor to a large engineer. UST services included inspections, reports, including the Federal UST checklist. TTI performed in 30 states including HI, AL and Puerto Rico.

ABOVE GROUND STORAGE TANK SERVICES

Removals, Installs & Upgrades
API and STI Inspection Programs
Federal SPCC Tank Inspections
Ultrasonic, Magnetic Particle & Floor Scanning Inspections
Piping Inspections
Tank Cleaning Services
Secondary Containment Construction
Demolitions
On-line Inspection Tracking
Acoustics Emissions (AE) Testing

AST services include the inspection, repair, removal and new construction of aboveground tanks. Services provided includes routine maintenance projects, repairs and replacements required due to corrosion, deterioration, or damage, as well as spill prevention, containment and countermeasure (SPCC) actions. TTI offers the latest in NDE equipment for Aboveground Storage Tank inspections, spheres, and piping by fully qualified API 653, 570, 510 and ASNT certified inspectors.

Removal / Install - Municipality

TTI was contracted to removed five (5) 4,000 gallon USTs, installed two (2) 4,000 and two (2) 6,000 ASTs with all ancillary equipment, site preparation, asphalt, concrete and necessary soil remediation.

Install - Federal

TTI was awarded a prime contract for the Department of Veterans Affairs, Montrose, NY. TTI crews removed eight (8) USTs, repaired eight (8) and installed three (3) 30,000 gallon and one (1) 1,000 gallon AST.

All services are conducted by certified API 653/570/510, AWS-CWI, ASNT and ASME inspectors. TTI utilizes the latest NDE equipment to perform Magnetic Flux Leakage (MFL) floor scans, ultrasonic thickness surveys, magnetic particle examinations, vacuum box testing, remote visual inspection robotics and more to assure reliable and safe operations.

API 653 Inspections – Federal / Engineering

TTI provided AST inspections for the USACE Omaha District and AFCEC under a contract with a large engineer, inspecting 1152 tanks at 41 Air Force Bases nationwide. TTI was contracted by the Air Force to film and produce a tank handler instruction DVD to be used at all installations.

API 570 Piping Inspections – Federal / Engineering

Under a team contract, TTI provided piping assessments for the Naval Facilities and Expeditionary Warfare Center (NAVFAC, EXWC) at Air Force bases and Air National Guard locations nationwide.

Inspections – Chemical Manufacturer

TTI provides ongoing AST, piping, welding and third party new equipment inspections for a major chemical manufacturer with facilities nationwide.

INSPECTIONS

AST Inspections API 653/570/510, STI SP001
Acoustics Emissions (AE) Testing
Non Destructive Examination (NDE)
Piping and Pressure Vessel Inspections
New Equipment Inspections
New Fabrication Inspection / Expediting
AWS – CWI Welding Inspection
Training for Periodic Tank Inspection Programs
